memorandum

date 2 May 2008
to Community Monitor Committee
from Kelly Runyon
subject CMC Meeting of 5/14/08 - Agenda Item 5.2 - Information Request from A.L.A.R.M.

For the convenience of Committee members, the questions and concerns raised by A.L.A.R.M. representative Robert Cooper are listed below.

1. Has the amended CUP been adopted?
2. Please provide the current Land Use Plan.
3. What is the location of the 750-acre Conservation Easement?
4. What is the status of the eminent domain action regarding Dyer Reservoir?
5. Have the groundwater wells required in the Settlement Agreement and CUP been installed? When?
6. Please provide Exhibit 1 (map).

Regarding item 1, ESA has found a copy of the CUP in the Community Monitor files that includes documentation of the adoption of the CUP. A link to this has been posted on the home page of the CMC web site. This version differs from other drafts in that it includes a requirement that transfer trucks be restricted to interstate highways, except for certain defined situations. This requirement was inserted as condition #69.

Item 5 is partially addressed in a separate memo from ESA that is related to Agenda Item 5.3.
